OPEN SOURCE SUMMIT  
EUROPE

# The AOSP Birds Of a Feather meeting

Chris Simmonds

#ossummit @csimmonds@fosstodon.org

AOSP developers are many but widely dispersed, so we don't get a lot of opportunities to get together and share ideas

But, here we are...

The mic is open to anyone (and everyone) to contribute

# Agenda

To get things going, here are some topics that I think are interesting

- What can we do to improve the AOSP community?
- Where do you get information about ASOP? Online, people, conferences?
- What are your experiences porting AOSP to real hardware
- Which AOSP build tag do you use?
- What are your main complaints about AOSP dev process?

# AOSP Community

- Open source should be more than just free code
  - share
  - communicate
  - contribute - code, bug reports, information (blogs, READMEs, HOWTOs)
- Tens of thousands of developers work on AOSP and AAOS
- Google is absent when it comes to platform building
  - <https://source.android.com/setup/community>

# Contributing to AOSP

- How can we best contribute upstream to AOSP?

# The AOSP and AAOS Meetup

Blatant plug:

You might be interested in the AOSP and AAOS Meetup group

On-line meetup up every 2 months (January, March, May, July, September, November)

Sign up: <https://www.meetup.com/the-aosp-and-aaos-meetup/>

Details of past meetups, including slides and videos:

# Finding out about AOSP

- Where do you get information about ASOP? online, people, conferences?

# Build tags

- How do you choose a good AOSP?

# The grumpy developer

- Main pain points in the AOSP dev process

# Call to action

- What should be do to make things better???

- Anything else we should talk about?
